Air Techniques Makes Earning Continuing Education Credit Simple

MELVILLE, New York — (September 19, 2017) — [Air Techniques, Inc.](#), a leading innovator and manufacturer of dental equipment, supports, hosts and provides many ways for dental professionals to earn [continuing education credits](#).

[Air Techniques](#) has partnered with various organizations to sponsor and provide [continuing education courses](#) through [traditional seminars](#) and [webinars](#). These courses are held nationwide and can earn dental practitioners up-to four CE credits at time. [CE webinars](#) can earn dental practitioners one CEU credit per one hour webinar.

In February of 2011, Air Techniques earned accreditation from the Academy of General Dentistry as a PACE Program Provider. This authorized Air Techniques to organize, conduct and award credits for continuing education courses for dental professionals. Their accreditation enables them to host a [CE programs](#) annually. During the CDA Anaheim annual meeting this year, Air Techniques provided a CE program that allowed dental practitioners to earn up-to 12 CE credits for free.

“As a leader in the dental industry we feel it’s our responsibility to not only offer high quality products but education for dental professionals,” said Jennifer Brown, [Air Techniques](#) Trade Show & CE Events Manager. “Advancing dentistry happens not only through innovative products but from knowing how and why these innovative products are important to use.”

There are various [CE courses and webinars](#) that Air Techniques is hosting and sponsoring throughout the month of September and beyond. Dental professionals can visit [Air Techniques' website](#) to view [course offerings](#), [register](#) for upcoming courses and even watch and earn CE from [past webinars](#). All this is available on the Air Techniques “events” page on their website.
